Emmett Therapy Certified Practitioner

Yvonne Campbell

The EMMETT Technique is a safe, unique form of muscle release therapy, which is internationally recognised and effective on both people and animals.

EMMETT Therapy involves the application of light finger pressure at specific points on the body, relieving pain and discomfort, creating postural changes, improving movement, flexibility and overall well-being. These points are referred to as 'Emmett points' and are different to traditional trigger or acupressure points described in any other therapy.

Key features of EMMETT Technique treatments:

- Accurate and fast assessments of body imbalances
- Can be done sitting, lying or standing
- Pressure applied does not need to be firm or painful
- Suitable for babies, during pregnancy, the elderly and everyone in between

Symptoms which may be relieved:

Injuries from sport or accidents

Unbalanced gait or stance

Lead/harness strain

Lower back distress

Inhibited movement

Muscle restrictions

Poor performance

Behavior changes
